

CONTENTS

BORÓWKA R. K., KOSTRZEWSKI A., ZWOLIŃSKI Z.: Cave sediments from the Chochołowska Valley (the Tatra Mountains, Poland): interpretation of sequences and depositional processes	5
HEIKKINEN O.: Paleoenvironmental and physiographic aspects of the Salpausselkä end moraines in southern Finland	25
KANIECKI A.: Component parts of the total runoff of the Wrześnica River	39
KLIMKO R.: Ecological aspects of modern denudation	67
KOSTRZEWSKI A.: Granulometric features of crystalline massif regolith in extreme climatic zones (Spitsbergen, Australia): interpretation of textural properties	77
MARSZ A. A.: Tentative assessment of the rate of isostatic movement on the Admiralty Bay shores in King George Island of the South Shetland Islands, West Antarctica	99
MIZGAJSKI A.: Spatial relationships between selected properties of young-glacial geocomplexes in agricultural use	107
SOŁOWIEJ D.: Variations in geochemical parameters of dominant and subdominant types of grain-size distribution of sediments within elementary landscapes of the Odolanów Basin	112
STANKOWSKI W.: Selected aspects of the dynamics of an ice sheet as exemplified by the Vistulian glaciation (a discussion)	137
WITT A.: Vegetational influences on intrachannel deposition: evidence from the Kończak stream, Great Poland Lowland, Western Poland	145
Woś A.: Results of measurements and observations of selected weather elements on the Ich Nart Plateau and in the Ulaan Nuur Basin (the north Gobi, Mongolia)	165
Woś A.: Bioclimatic regions in Mongolia	181
