

CONTENTS

AGATA BUCHWAŁ, MARCIN WINOWSKI: Reconstructing temporal patterns of rotational landslides activity using dendrogeomorphological approach (Wolin Island)	5
PIOTR DEMCZUK, EUGENIUSZ GIL: The application of the USLE model in the automatic mapping of soil erosion intensity in the Bystranka catchment (Flysh Carpathian)	15
WACŁAW FLOREK, JACEK KACZMARZYK, MAREK MAJEWSKI: Intensity and charakter of cliff evolution near Ustka	27
MARCIN HOJAN: Aeolian processes of the cliffs of Wolin Island	39
V.C. JHA: Ecogeomorphological assessment of degraded lateric terrain and integrated management in the south western Birbhum district, West Bengal, India	47
BEATA KOWALSKA, MARZENNA SZTOBRYN: Mean sea level changes along Polish coast	69
AGNIESZKA KUBOWICZ-GRAJEWSKA, HALINA PIEKAREK-JANKOWSKA: The influence of submerged breakwaters on the nearshore zone lithodynamics in the region of the cliff coast in Gdynia-Orłowo	75
MARIUSZ SAMOŁYK, JACEK TYLKOWSKI: Morphology and lithology of the cliff shore of Petunia Bay in the Wordiekammen-Ebbaelva section, Central Spitsbergen	85
CZESŁAW SUCHOCKI, ALOJZY WASILEWSKI: Geodetic survey of cliff shores with the application of scanning technology	93
MARCIN WINOWSKI: Mechanism of the activities of rotational landslides on the cliff coast of the Wolin Island (north-west Poland)	101
