

CONTENTS

KOTARBA A., KOZARSKI S., STARKEL L.: Geomorphology in Poland: main trends of development in the past three decades	5
ANTCZAK B.: Rhythmites on lower terraces of the Warta river, Poland, and their paleohydrologic implications	31
BAUMGART-KOTARBA M.: Formation of coarse-gravel bars in the braided Białka river	45
BIERNAT T.: Areas supplying weathered material and the mechanism of transportation of the suspended material in the Łososina catchment area (Holy Cross Mountains, Central Poland)	61
DAWIDOWSKI J., RATAJCZAK W., STANKOWSKI W.: Application of trend-surface analysis in evaluation of landform and bed surface	75
IZMAIŁOW B.: Eolian transport in alpine part of the High Tatra Mountains	91
KARCZEWSKI A.: Spatial arrangement of morainic plateau levels of the northern sloping surface in Pomerania as a result of varying deglaciation	99
KARDASZEWSKA E.: Regularities in the configuration of main morphostructural units of the Earth globe in the light of a relative relief map	109
KOSTRZEWSKI A., ZWOLIŃSKI Z.: Chemical denudation rate in the upper Parsęta catchment, Western Pomerania: research methods and preliminary results	121
KRZEMIEN K.: Present-day activity of the high-mountain stream in the Western Tatra Mts.	139
ROTNICKI K.: Postglaciotectonic surface as a basis of analysis of fluvial relief development in areas of glacial deposition	147
